Product Description**No.1 ASME 1219mm 304 Stainless Steel Coils 3mm Stainless Steel Hot Rolled Coil**

Stainless steel coil was originally utilized in the building industry as it is a major building material or raw material used in the construction industry for the manufacturing of building products. The ornamental panels on the building's outer wall and the internal wall design are often composed of stainless steel coils. They are not only long-lasting, but also highly attractive. With the continued growth of interior decorating, stainless steel coils are increasingly being employed as ornamental materials in the home renovation business. Stainless steel coils in a variety of finishes may be used not only for construction outsourcing, but can also be made into a variety of ornamental plates.
